## Student Activity Construction 14

Use in connection with the interactive file "construction 14" on the Student's CD.
Construction 14: To construct a Right-angled triangle, given one side and one of the acute angles (several cases).

1. Construct a right angled triangle $A B C$ given the lengths $|A B|=6 \mathrm{~cm}|\angle A B C|=50^{\circ}$ and $|\angle A C B|=90^{\circ}$.
2. In the triangle drawn in question 1 measure the other angle. $\qquad$
Find the sum of the three angles $\qquad$
Find the measure of the other sides of the triangle. $\qquad$
3. Construct a triangle $P Q R$ such that $|P Q|=7.5 \mathrm{~cm},|\angle R P Q|=60^{\circ} \mathrm{cm}$ and $|\angle P Q R|=90^{\circ}$.
