## Student Activity on Equation of a Line

Use in connection with the interactive file "Equation of a Line" on the Student's CD.

## To explore equations of a line in the form $\mathbf{y}=\mathrm{mx}+\mathrm{c}$

1. Move the slider $m$. What happens the slope of the line as $m$ increases? $\qquad$
$\qquad$
2. Move the slider $m$. What happens the slope of the line as $m$ decreases? $\qquad$
$\qquad$
3. Move the slider $m$. When $m$ is positive describe the line $\qquad$
$\qquad$
4. Move the slider $m$. When $m$ is negative describe the line $\qquad$
$\qquad$
5. Move the slider $m$. When $m=0$ describe the line $\qquad$
$\qquad$
6. Which part of the equation of the line is related to the slider $m$ ? $\qquad$
7. Move the slider c . What happens the line as c increases? $\qquad$
8. Move the slider c . What happens the line as c decreases? $\qquad$
9. Move the slider c. Compare the value of $c$ to the point where the line crosses the $y$ axis. Describe the relationship between c and this point (the y -intercept)?
$\qquad$
$\qquad$
$\qquad$
10. Which part of the equation of the line is related to the slider c ? $\qquad$
11. The equation of a line is $y=2 x+3$. Write down the slope of this line $\qquad$
12. Write down the point where the line $y=2 x+3$ crosses the $y$-axis $\qquad$
13. Keeping $c=0$, move the slider $m$. Describe what is special about the lines that have $\mathrm{c}=0$ $\qquad$
14. The equation of a line is $y=5 x$. Write down the slope of this line $\qquad$

Write down the coordinates of the point where the line $y=5 x$ crosses the $y$-axis $\qquad$
If you've completed "Student Activity on Slope" you should try the file "Constructing a Line Quiz 2" to test what you have just learned.
