## Student Activity 1d

Tables for each of the functions below are drawn on the next page of this document for $x \in\{-3,-2,-1,0,1,2,3\}$.
Fill out the tables for each function first so that you can decide on a scale which will suit all the functions when plotting a graph.
Plot all the graphs using the same axes and scales on the grid given below. Verify the shape of each graph by calculating y values of points, between those plotted, and comparing the answers with the $y$ values of the same points given by your graph.

| Polynomial in the form $f(x)=a x^{2} \pm c$ | State the shape of the graph and whether it opens upwards or downwards | x- <br> intercepts <br> (algebraic <br> method and using the graph) | $y-$ <br> intercept <br> (algebraic <br> method <br> and using <br> the graph) | Maximum/ minimum point as an ordered pair and labelled as max or $\min$ | Real root(s) of $f(x)=0$ | Equation of the axis of symmetry | $\begin{aligned} & \mathrm{f} \\ & (2.7) \end{aligned}$ | Solve $f(x)=$ <br> 8 | For what x values is $f(x)$ positive i.e. $f(x)>0 ?$ | For what x values is $f(x)$ negative i.e. $f(x)<0 ?$ | For what x values is $f(x)$ increasing? | For what $x$ values is $f(x)$ decreasing? |

1. What is the effect of the constant $a$ on the graph of the function $f(x)=a x^{2} \pm c$ ? Explain
2. What is the effect of the constant $c$ on the graph of the function $f(x)=a x^{2} \pm c$ ? Explain

## Student Activity 1d

Draw the graph of $\mathrm{y}=x^{2}$ using a black marker and use different coloured markers to draw the other curves.

Label all the graphs clearly.
