

Financial Maths Online Seminar

Tuesday Sept 20th 17:00 - 19:00

Or

Thursday Sept 29th 17:00 - 19:00

This online two-hour event will explore teaching approaches that can be used to meet the learning outcomes of the Leaving Cert. syllabus commonly referred to as Financial Maths. Rather than being treated as a standalone topic, we will explore how to support students to apply their understanding of sequences and series to model annuities, mortgages and other financial products. As part of this, problem-solving and visual approaches will be emphasised.
